

Swan Meadows – Neighborhood Project Office & Project Contact

Neighborhood Project Office A physical office for the project engineer is being established within the Swan Meadows neighborhood. The office will provide a local point of contact for residents and support coordination among the project engineer, contractor, and City staff.

Having a neighborhood-based office will help facilitate field coordination, improve communication, and support timely follow-up on resident questions and construction-related issues.

Once the office location is established, the City will announce its address, contact information, hours of availability, and procedures for scheduling appointments.

Additional Information and Project Contacts Additional project information and a more detailed construction schedule are available through the City's designated project webpage or by contacting the City of Aberdeen.

Project Contact:

Parley Hess, P.E.
City of Aberdeen
Phone: (410) 322-9615
Email: phess@aberndeenmd.gov

The City appreciates the community's patience and cooperation as this important infrastructure improvement project moves forward. Continued communication with residents will remain a priority throughout construction.
