

Central Water Treatment Plant
Road Closure Notice

October 12, 2026

Dear Property Owner/Resident,

The Central Water Treatment Plant (WTP) project at 1290 North Frontage Road includes watermain construction in the street that will require a temporary road closure of both lanes for two weeks.

Purpose: The watermain connections in the street in front of the Central WTP are necessary to deliver raw water into the plant and to convey treated water out to the distribution system. Once the Central WTP is in service next spring, it will provide PFAS-free drinking water to the system.

Location: Both lanes of North Frontage Road will be fully closed and barricaded for the approximately 350-ft length of road in front of the Central WTP site at 1290 North Frontage Road. The Pleasant Ridge Townhomes will be accessible from the west, and the businesses will be accessible from the east. Signs will indicate that the road is closed to through traffic and that businesses are still accessible during construction. See attached Detour Map.

Schedule: The temporary road closure is scheduled for **October 19-23** and **October 26-30**. The road will be open over the weekend between these two weeks.

Restoration: After these watermain connections, the affected areas will receive temporary asphalt pavement for the winter, and then permanent paving will be completed in spring 2027.

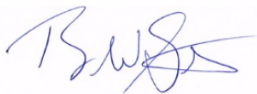

Bus Stop: The school bus stop previously located on North Frontage Road in front of Carbone's has been permanently moved a block west to avoid the construction zone and public works facilities, so the bus will arrive from the west during this temporary road closure.

Contractor: Magney Construction, Inc. of Chanhassen, MN is the Prime Contractor.

Questions in the Field? The City has a full-time construction observer on site for any questions (Jon Christensen can be reached at 612-437-7967).

For more info, please contact the Engineering Department at 651-480-2334.

Thank you!

Ryan Stempski, P.E.
