Howard Leibrand, M.D., Health Officer

Skagit County Certified Operations and Maintenance (O&M) and Pumping Providers

Updated 10/14/2026

The following providers have met the minimum certification requirements to perform work on on-site sewage systems (OSS) in Skagit County. Please be aware that some OSS have proprietary equipment or devices that, according to the manufacturer or distributor, require specialized training from the manufacturer or distributor above and beyond the minimum certification requirements of Skagit County Public Health. This list is not an endorsement of the named service provider; nor does this list provide a warranty or assurance of quality. It is recommended that you contact more than one provider for estimates.

O&M Level 1: can inspect or perform minor repairs for conventional gravity, conventional pressure, gravity w/pump systems
O&M Level 2: can inspect or perform minor repairs for conventional gravity, conventional pressure, gravity w/pump, public domain systems (mound, sandfilters, etc.) and proprietary or alternative systems in which they have obtained the required training from the manufacturer or distributor
