On-Site Septic System Designer List

Updated 10/14/2026

Septic Designers: Skagit County Public Health (SCPH) does not license septic designers. This is done by Washington State Department of Licensing (DOL). Individuals with on-site wastewater designer or professional engineer licenses can do septic design work across the state. They can be hired to design new septic systems, design major repairs that require a permit, submit record drawings (as-builts) to the Health Department, and designate new reserve areas.

Double-check license status! Use DOL's License Lookup tool (https://professions.dol.wa.gov/s/license-lookup) to verify the septic designer you select has an active license. Use the Advanced Search option to narrow results to those with an active license in our county or surrounding areas.

Questions? Please contact the Board of Registration for Professional Engineers & Land Surveyors (360-664-1561). File complaints by visiting https://brpels.wa.gov/complaints/filing-complaint.

This list is provided as a courtesy only. This list may not be all-inclusive. SCPH does not endorse or recommend any designer or engineer, nor does SCPH guarantee or warrant work performed by individuals listed. If you are an active licensed on-site designer or professional engineer and would like to be added to this list, please email septic@skagitcountywa.gov.
