Get Ready for Old-Fashioned Christmas: Parade Route Info

On December 1, the City met with MainStreet Truth or Consequences to finalize plans for the Old-Fashioned Christmas celebration, taking place Friday, December 12. The event will kick off with a 6:00 PM tree lighting at Evelyn Renfro Park, followed by the parade that begins at 6:30 PM. To accommodate festivities, Broadway and Main will be closed under an NMDOT permit beginning at 5 PM. Drivers can detour via Austin Street, accessible from East Riverside Drive. Main Street will reopen after the parade concludes, while Broadway will remain closed until 10 PM.

Please note that all parked vehicles on Broadway and Main must be removed by 4 PM, as police will begin rounds at that time. Cars left after 5 PM are subject to towing, as parked vehicles can restrict float and large vehicle access.

This year's parade promises plenty of holiday cheer, and spots are still available! To join, contact Becca Eza at (575) 208-4093.

Boat Dock Construction Underway at Ralph Edwards Park

Construction on the new boat dock is officially underway, bringing exciting improvements to river access and recreation in Truth or Consequences. This project involves careful coordination to manage water levels, protect local businesses, and meet environmental requirements—all while creating a safer, more organized launch point for boating and tubing. Want to learn more about the timeline, challenges, and what this means for our community? Read the full article in our homepage's news section and explore project details at torcnm.gov/blueprint.

Preserving Night Skies in Truth or Consequences: Community Voices and the Love's Travel Stop Project

Truth or Consequences is one of the few places where you can still step outside and see the Milky Way stretching across the night sky, but will that change as new development arrives? With the Love's Travel Stop under construction at Exit 79, community members and city leaders have been working to balance economic growth with environmental stewardship. Learn how local voices, dark sky standards, and innovative planning are shaping the future of our skies—and what you can do at home to help preserve this incredible natural treasure.
