Celebrating the Teamwork Behind Earth Week Dump Days

The City extends a heartfelt thank you to the dedicated volunteers and hardworking staff who made our Earth Week Dump Days—held April 17, 18, 20, and 21—a tremendous success. Your willingness to step in and help truly "take a load" off city staff allowed residents to clean up their yards, dispose of unwanted items, and make our community cleaner, safer, and more beautiful. We are especially grateful to volunteers from 4-H, Sustainable T or C, Litter Pickers, Tree or C, city volunteers, and all community members who gave their time and energy. If we missed anyone by name, please know every helping hand mattered. This event showed what we can accomplish when volunteers and staff work side by side for the good of our community. Thank you for making Earth Week Dump Days a successful event.

From Parade to Park: Our Army Helicopter

The U.S. Army helicopter featured in the Fiesta parade is now officially on its way to becoming an addition to Veterans Memorial Park, thanks to the U.S. Army Donation Program. While the structural design and funding for its permanent display are still in progress, the helicopter will be set in the park on a trailer with temporary fencing so the community can enjoy it within the required one-year timeframe. We extend our sincere thanks to Bartoo Sand & Gravel for generously loading, transporting, and unloading the helicopter since its arrival. This remarkable addition will enhance the Veterans Wall and stand as a powerful tribute to those who have served.

A Faster Way to Pay Your Utility Bill

Scan for Website

As Truth or Consequences continues modernizing its city services, the Utility Billing Department is introducing new tools that make it easier and faster for customers to manage their accounts. With Tyler Technologies' Text-to-Pay system, residents can receive bill reminders, view their balance, and make secure payments directly from their mobile devices, no office visit or phone call required. For a small team that supports thousands of customers each month, these digital options free up valuable time to assist residents with more complex needs, from service questions to account changes. As we work to expand convenient, self-service tools for our community, we encourage residents to try Text-to-Pay using the QR code to the left.

Foch Street Project Update: Week of May 4

Landscaping crews will be on site this week installing new irrigation lines and bubblers. Concrete work also continues on the project's north end, including the seat walls in front of the Lee Belle Johnson Center. The City thanks Fiesta visitors for sticking to the marked paths and helping keep the work zone safe.
